- Frameworks: ReactJS, NextJS;
- State managers: Redux Toolkit, MobX;
- CSS Preprocessors: SCSS, SASS;
- CSS Framework: TailwindCSS;
- UI Libraries: MaterialUI, ChakraUI;
- CSS-in-JS: styled-components;

---

### WORK EXPERIENCE

#### October, 2023 - Present | Balancyй | Front-End Developer

Domain: Productivity.

Stack: ReactJS, Redux Toolkit, styled-components.

Achievements:

- Designed and implemented a responsive calendar widget enabling intuitive month navigation and date selection, optimized for fast rendering.
- Developed a task prioritization page with high, medium, and low priority columns, incorporating drag-and-drop functionality for seamless task reprioritization.

#### July, 2023 - September, 2023 | Front-End Developer

Domain: Real-Time Chat.

Stack: ReactJS/NextJS, Supabase, MobX, Tanstack Query, TailwindCSS.

Achievements:

- Developed a real-time chat application using ReactJS/NextJS, Supabase, MobX, Tanstack Query, and TailwindCSS.
- Successfully implemented Supabase for real-time updates, enhancing user engagement.
- Implemented server state management using Tanstack Query for improved application efficiency.
- Integrated authorization features using Next-Auth for enhanced security.
